Testimonial Letter

This is to give references to the product ODOR GONE (Aircraft Odor Neutralizer) produced by Chemtech Intl. Inc.

Odor gone in spray-bottles was tested in 2003 on board of our aircrafts i.e. in the cabin and lavatories with positive results. Application of Odor gone in combination with usual cleaning products reduces the bad odour. Since January 2004 the utilization of Odor gone has been included in standard inflight service procedures of Czech Airlines.
It is used by cleaning staff for cleaning the aircraft cabin before flight departure and it is also available for cabin attendants to be applicated during the flight when needed.

With best regards,

Jitka Jechova
Senior manager IFE & Cabin Comfort
Czech airlines
