

ABSORBENT GP

SOCKS

Absorbent GP (General Purpose) socks are ideal for absorbing and containing your machinery and equipment leaks. These socks are designed with patented Absorbent GP to absorb all non-aggressive liquids on contact and lock the absorbed liquids into the cellulose fibers. Eliminate leaking socks as the Absorbent GP retains the liquids it absorbs, preventing unwanted leaching and draining. Use Absorbent GP socks for your maintenance requirements.

Available in:

Stock No.	Description	Items/Unit	Absorption Capacity/Unit (Gallons)/liters
33032	3" X 4' Fabric Sonata	10/box	Up to 18 /68 L
33033	3" X 8' Fabric Sonata	6/box	Up to 22 /83.6 L

Competitive advantages of Absorbent GP socks over polypropylene and clay absorbents:

- Absorbs liquids within fibers vs. adsorbing liquids on fibers exterior only
- Absorbs immediately on contact
- Absorbs up to 2-3 times more volume than polypropylene absorbents, minimizes waste
- Absorbs up to 7 times more volume than clay sorbents.
- Retains the liquid absorbed; prevents leaching and draining of absorbed liquids
- Absorbs all liquids except strong inorganic acids and caustics
- Anti-static
- No free silica-prevents health problems(silicosis) associated with clay and diatomaceous earth
- Works in all temperatures, sub-freezing to hot
- 100% organic-environmentally friendly
- Increases options for disposal
 - Landfill – passes and exceeds Toxicity Characteristics Leaching Procedure(TCLP), Paint Filter Test – won't leach/drain, eliminates free liquid problems
 - Incinerable at low temperatures (industrial boilers, etc.)
 - Bioremediation – will break down to natural organic elements with use of microbial enzyme action
- Environmentally responsible from origin to disposal
- The environmentally alternative to polypropylene and clay
