

# Vial Loading Trays

3-Sided Tray with an easy slide removable gate for Parenteral Drugs

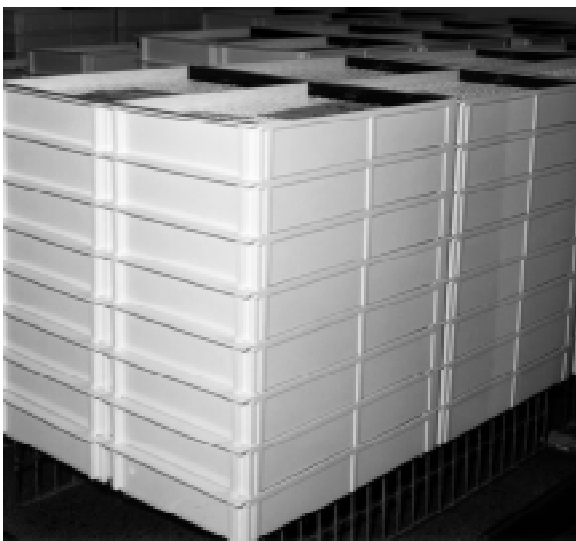

*Model 229008 Vial Loading Tray*

*Size shown: 20 7/8" (530 mm) Long X 14 3/8" (365 mm)*

*Wide X 3 7/8" (98 mm) Deep.*

*The open gate eases unloading allowing the operators to slide vials into the infeed of the packaging line in just a few seconds.*

- Tray is made of composite material that provides a slippery surface so vials slide easily.
- Tray withstands temperatures from -60° F. to +250° F. (continuous service) or +300° F. (intermittent service).
- Improved stackability and more economical than most metal trays.
- Excellent dimensional consistency for machine integration and robotic applications.
- Excellent dimensional stability and load carrying capacity without creep or distortion.
- Provides a secure grip for easy lifting without sharp edges.
- Tapered front lip for easy loading and unloading.
- Easily cleaned and sanitized with no cracks or crevices.
- Easy incineration should contamination occur.

*Left: The trays offer improved stackability during warehouse and in-plant transportation with better stacking strength and load stability.*
