The ROPAK 7048's Drop Doors on the 70" side are attached with articulated hinges. These innovative hinges allow the door to lay flat against the side of the container, reducing the potential for damage and increasing handling safety.

Rigid Load: Part is rigid across length and spans a minimum of 60".
 Distributed Load: All other unsupported loads.

All dimensions and specifications are approximate. Interior height dimensions measured from center. Tare weight will vary based on color, height and drop door configuration. Performance characteristics are based on uniform static loads and may be affected by concentrated loads and elevated temperatures. Label holder availability and options depend on container height. HDPE materials and workmanship guaranteed for 3 years.

Cover Available

Please see page 24 of this catalog for the cover options offered for ROPAK 7048 Extended Length containers.
