**Subject:** OdorGone – Neutralizing bad odors from Diesel Engine Fumes on a boat

Hi Elizabeth,

WE have been to the boat and done everything you suggested and a bit more.

We have now sealed the boat so that if the diesel fumes are still there we will be able to detect them straight away.

I expect them to be slightly there as the amount of OdorGone that we used I felt was not quite strong enough for the area we had to try and cover. The engine compartment will always have a diesel fuel smell but the main strong diesel smell has reduced dramatically

We are not going again until Sunday 5th July so we are giving the fluid time to cure the odour, but as you know this type of thing takes time and patience, so I will be back in touch with you late next week with the update and hopefully with a positive answer. One question - can Odorgone be bought in larger quantities, if so let me know the amounts and cost plus delivery, as the amount of people I have spoken to about your product are very interested in purchasing it from you, as am I.

Speak to you next week.

Regards,

Jamie

**Subject: Result of OdorGone application to neutralize bad smell from Diesel Engine Fumes on our boat**

Hi Elizabeth,

We went to the boat earlier than expected, we were very pleased by what we found regarding diesel odour, very little left in the atmosphere, EXCELLENT RESULT.

Remember we had locked and sealed the hull to see what would happen, well as they say on the tin (It does exactly that)

We are delighted, so now we want to purchase a lot more with your direction.

1 - We want to be able to mop it throughout the decking (Floor)

2 - We want to be able to spray it in the engine room after a long day traveling (or were the cats have left there mark)

3 - My daughter would like to be able to do both the above and more.

One question - I am being asked by all the people I have spoken to. Why is it that this product has not been heard of, or seen on the likes of TV and radio stations? It seems that it is a major seller, and it seems to have been ignored, the question is why?

Regards.

Jamie.
