OdorGone SINGLE PORTION CAPSULE

** Single Portion capsule (patent pending) is a unique "portion packaging" produced by Chemtech International Inc.

** OdorGone in Single Portion Capsule or in Spray bottle or in Solution is a truly malodor **Neutralizer** and not a masking agent.

** Do Not Eat or Swallow or Use teeth to open a capsule.

** In order to maintain the integrity of OdorGone as a Natural, biodegradable product, the special type of proprietary gelatin and color used for the capsules are biodegradable.

** Each capsule contains concentrated OdorGone, which **dissolves in warm water in 5 to 10 minutes.**

** When using **cold water from the tap, twist the fin of a capsule and squeeze OdorGone into the water.**

** Single Portion packaging does NOT replace OdorGone **Professional** or **Consumer** Grades in solution or in spray bottles. However, **there are specific Institutional and Household applications where single portion of OdorGone has advantages over OdorGone Professional or Consumer Grade ready-to-use solution for odor control. For example:**

(a) **Mop water:** Squeeze (1) capsule into a 4-gallon/16-liters mop-bucket cleaning solution---mix well for 5 minutes.

(b) **Carpet Shampooing machine:** Squeeze (1) capsule into 1-US gallon or 4 liters cleaning solution reservoir of a carpet shampooing machine---mix well for 5 minutes.

© **Paint** - Latex, Acrylic or Oil base: Squeeze 1 or 2 or 3 capsules in
1 US-gallon/4 liters Latex or Acrylic or oil based paint---mix well

for 5 minutes.

(d) **Humidifier:** Squeeze in (1) capsule into the water reservoir

(e) **Laundry:** Squeeze (1) capsule in rinse cycle in a household washing machine (10 kg load). For commercial laundry machines, squeeze in 2 or 3 capsules depending on size of load of a washing machine.

(f) **Onboard planes, toilets on bus, train, boat, camper or portable toilets in a park or campground:** Squeeze in 2 or 4 capsules into toilet bowl. Number of capsules squeezed in depends on a toilet bowl capacity.

Advantages of Single Portion Soft Gelatin OdorGone Capsules:
(Win-win situation for Supplier, Distributors and Customers)

--**Cost-effective and No Wastage:** Single Portion soft gelatin capsule is cost-effective as there is no wastage of the product. For the above-mentioned specific applications, exact amount of OdorGone from a capsule is used---a customer does not have to use a measured amount of Professional Grade ready-to-use solution.

--**Convenience:** Space saving in a storeroom; easy to carry; lightweight; no measuring of product; no spillage or wastage.

--**Saving in Shipping Cost:** Cheaper to ship capsules by Air from the USA to our Distributors. For Distributors also, it is cheaper to ship, via courier or via post, to their customers in small boxes.

Just to name a few Potential Users for OdorGone Soft Gelatin Capsules:

- Air Planes
- Hotels
- Motels
- Restaurants
- Hospitals, Nursing Homes
- Office Buildings
- Homes
- Schools, Colleges
- Health Clubs
- Daycare Centers
